1. Using a dplyr function interactively

```r
arrange(starwars, desc(mass))
```

2. Using a dplyr function with a saved variable

```r
var <- expr(mass)
arrange(starwars, desc(!!var))
```

3. Using a dplyr function inside a function

```r
arrange_desc <- function(.data, var){
  var <- enexpr(var)
  arrange(.data, desc(!!var))
}
arrange_desc(starwars, mass)
```
